

H1N1 Intranasal Mist vs. Injectable Vaccine

If someone received:	Can they get H1N1 injectable today?	Can they get H1N1 intranasal today?
Seasonal FluMist today or less than 4 weeks ago	Yes	No
Injectable seasonal flu or H1N1 vaccine any time this year	Yes *	Yes *
Any other live virus vaccine less than 4 weeks ago (e.g. varicella or MMR)	Yes	No
Any other injected live virus vaccine today	Yes	Yes

If two doses of either H1N1 or seasonal flu vaccine is required, a minimum of 4 weeks should lapse between doses 1 & 2.
